SUMMARY

Since 2022 I've been building interfaces and management systems with Vue.js, from Figma prototype to delivery; today also with TypeScript and Ruby on Rails, at Talenses Group. Outside work hours, I build my own products at Jay Labs.

SKILLS

Front-end: Vue.js 3, Nuxt, React, Sass

Languages: TypeScript, JavaScript, Ruby, PHP

Back-end: Ruby on Rails, Laravel, Node.js, NestJS

Data: PostgreSQL, Prisma, Elasticsearch

Tools: Docker, Git, GitHub, GitLab, Postman, Figma, Adobe XD

Methods: Scrum, Kanban

EXPERIENCE

Full Stack Developer · Talenses Group

Mar 2026 – present

São Paulo, SP

- Management interfaces and systems for HR and recruiting: Vue.js front-end architecture and integration with Ruby on Rails APIs.
- Recruiting platform: worked on restructuring candidate forms and configuring dynamic fields for admission and data management.
- Design system for the HR system: interface refactor, tokens, brand concepts and screen components (such as the login), prototyped in Figma and Claude Design and built with Reka UI and shadcn-vue, with a focus on accessibility.
- Template refactoring, dynamic validations and performance and search optimizations in the admin system.

Technologies: Vue.js, TypeScript, Ruby on Rails, Elasticsearch, Docker, Reka UI, shadcn-vue, Figma, Claude

Frontend Developer · Uappi

Jan 2023 – Feb 2026

Birigui, SP

- Custom layouts for e-commerce sites.
- Restructuring of the e-commerce management system to Vue 3 and Nuxt: a customizable configuration BackOffice, with complex components configurable through the API.
- Checkout V2 and V3 and digital-products checkout: building and restructuring components, integrating payment methods and adapting the flows.
- Many complete components built from scratch for the platform.
- WellCommerce: an e-commerce platform where users set up their own online store in just a few clicks.

Technologies: Vue.js, Nuxt, TypeScript, Sass

Junior FullStack Developer · Smarti

Feb 2022 – Dec 2023

Curitiba, PR

- Order-management RPA for Eurofarma, sending e-mails to suppliers and integrating with spreadsheets: front-end and back-end, from the start to deployment.
- Project and budget management system for electronic circuit boards, from design to acceptance.
- Web system prototypes in Figma and Adobe XD.

Technologies: Vue.js, JavaScript, Laravel, Figma, Adobe XD

Production Processes Assistant (earlier, intern) · Unimed Araçatuba

Sep 2017 – Jan 2022

Araçatuba, SP

EDUCATION

Bachelor's in Computer Engineering

2016 – 2021

UniSALESIANO (Centro Universitário Católico Salesiano Auxilium), Araçatuba

LANGUAGES

Portuguese: Native · English: Intermediate
